

TECHNICAL SERVICES

HIGH QUALITY SOLUTIONS WITHOUT COMPROMISE

WHY CHOOSE SGC AUSTRALIA

SGC Australia are a multi-discipline organisation with over 15 years of experience offering full turnkey solutions for process plants, pumping stations, bulk handling facilities and mobile machines.

We provide electrical, controls, mechanical and structural, design, manufacture, construction, commissioning and optimisation services for both large and small scale projects, of short and long term duration.

Backed by an experienced electrical, controls, mechanical and structural engineering support team, our technically competent and highly skilled team of trades and supervisors are on hand, ready to be mobilised to site by our responsive, inhouse mobilisation team at short notice.

We are well equipped with all of the necessary tooling, including fully stocked mobile tooling containers. We have the know-how to ensure works are executed to the highest of standards, both safely and on time.
